

Field Service Engineer

ABUS is a world leading manufacturer of industrial crane systems and crane components. This innovative family-owned company continues to grow steadily and is known for its high-quality products and reliable customer service. In the UK, over 30 employees work enthusiastically towards the success of ABUS. Honesty, safety, and quality are the core values of our company.

What you can expect from us

- A good salary depending on your knowledge and experience, with the potential to grow.
- An extensive onboarding program with internal and external training, including LEEA, IPAF, CPCS and forklift license.
- Fully equipped service van including tools, PPE, mobile work platform and fuel card
- Company mobile and tablet
- 25 days annual leave entitlement plus 8 bank holidays

As a Service Engineer at ABUS Crane Systems Ltd, you carry significant responsibility for the safety and reliability of the crane systems entrusted to you. You will depart from home with your service van to visit clients in the industry and workshops. Your tasks include assembly, preventive maintenance, periodic inspections, repairs, and troubleshooting.

At ABUS, we strive not only for satisfied customers but also for satisfied engineers. You are the face of our company and have ample opportunity to perform your work well. We minimize overtime as much as possible and focus heavily on your development through internal and external training programs.

What we're looking for

- C&G Electrical qualifications, preferably C&G 2365 Electrical Installation or equivalent
- Electrical engineering 3 phase experience
- Hold a current full UK driving licence
- Not afraid of working at heights
- Proactive attitude and strong communication skills

Are you the one we are looking for?
